Medical Journal of Indonesia

The **Medical Journal of Indonesia** (abbr: Med J Indones) was founded in 1991 as the Medical Journal of the University of Indonesia (abbr: Med J Univ Indon). It has been published quarterly consistently and continuously since 1992, covering a wide range of medical subject and issues from every medical specialist aspect. In 1995 the name was changed to Medical Journal of Indonesia which reflected the widening of its coverage beyond. Started from 2011, Deutsch-Indonesische Gesellschaft für Medizin (DIGM) Medical Journal has been merged to Medical Journal of Indonesia. This also means Medical Journal of Indonesia is officially collaborated with DIGM and Faculty of Medicine Universitas Indonesia as the publisher.

Focus and Scope

Medical Journal of Indonesia focuses on promoting medical sciences generated from **basic sciences, clinical, and community** or public health research to integrate researches in all aspects of human health.

This journal publishes **original articles, reviews,** and also interesting **case reports**.

Brief communications containing short features of medicine, latest developments in diagnostic procedures, treatment, or other health issues that is important for the development of health care system are also acceptable.

Letters and commentaries of our published articles are welcome.

Abstracting and Indexing

ACI; BASE; CAB Abstracts; CiteFactor; CNKI; Dimensions; DOAJ; EBSCO; Electronic Journals Library; Embase; ESCI; GARUDA; Global Health; Google Scholar; Hinari; IMSEAR; ISC; JournalTOCs; Microsoft Academics; PKP Index; Proquest; Scilit; Scopus; SINTA; Ulrichsweb Global Serial Directory; WorldCat.

Open Access Policy

This journal is an open access journal which provides immediate, worldwide, barrier-free access to the full text of all published articles without charge readers or their institutions for access. Readers have right to read, download, copy, distribute, print, search, or link to the full texts of all articles in Medical Journal of Indonesia.

Subscription

The printed issue should be subscribed for a full calendar year. The price per volume (four printed issues): international USD 160 (surface postage included), for ASEAN countries USD 100 (surface postage included), for Indonesia IDR 400,000 (surface postage excluded). This journal is published quarterly.

Advertising Policy

Editorial materials will not be influenced by advertisement. Readers can criticize the advertisement by sending it to the office. Advertisement will appear in the print or online version depending on request. For all inquiries, contact the Medical Journal of Indonesia editorial office at Medical Journal of Indonesia, Education Tower 6th floor IMERI building, Faculty of Medicine Universitas Indonesia, Jalan Salemba Raya 6, Jakarta Pusat 10430, Indonesia; tel: +6221-29189160 ext. 201605; e-mail: mji@ui.ac.id.

Copyright Notice

Faculty of Medicine Universitas Indonesia as publisher reserves the right of first publication of all published material and licensed under a Creative Commons Attribution-NonCommercial 4.0 International License (<http://creativecommons.org/licenses/by-nc/4.0/>). All statements in articles are the responsibility of the authors.

Contents

Editorial

- 205 Taking stance against the challenges of communicable diseases and antimicrobial resistance
Hans-Joachim Freisleben

Basic Medical Research

- 207 Soybean extract increases telomerase reverse transcriptase protein expression in pancreatic β -cells of diabetes mellitus-induced rats
Muhammad Samsul Mustofa, Franciscus Dhyanaagiri Suyatna, Mohamad Sadikin, Dwi Ari Pujiyanto, Aan Royhan, Kenconoviati Suwardji
- 215 Comparison of intravitreal antifungal 100 μ g voriconazole and 5 μ g amphotericin B in experimental *Aspergillus flavus* endophthalmitis model in rabbits
Alia Arianti, Rianto Setiabudy, Anna Rozaliyani, Nurjati Chairani Siregar, Made Susiyanti
- 223 The effects of intensity and duration of aerobic exercise on spatial memory function in male Wistar rats
Neng Tine Kartinah, Sophie Yolanda, Tahyatul Bariroh
- 228 Aerobic exercise combined with environmental enrichment improves spatial memory and enhances neuroligin 1 expression: an animal study
Faizah Abdullah Djawas, Sri Redjeki, Ria Kodariah, Neng Tine Kartinah
- 234 Gluthathione S-transferase-resuscitation-promoting factor B recombinant protein of *Mycobacterium tuberculosis* induces the production of interferon- γ and interleukin-12 in mice splenocytes
Andriansjah Rukmana, Burhanuddin Rasyid, Fithriyah Sjatha

Clinical Research

- 241 Acupoint-catgut embedment combined with medication does not decrease interleukin-6 levels serum in patients with gastroesophageal reflux disease: a randomized controlled clinical trial
Andalia Fitri, Murdani Abdullah, Iris Rengganis, Hasan Mihardja, Intan Suri Baginda, Ainil Masthura
- 246 Role of platelet-rich fibrin in enhancing the viability of autologous microlobular fat graft: an animal-based experimental study
Trimartani Koento, Mirta Hedyati Reksodiputro, Olvi Nancy Marimpan
- 252 Prevalence of methicillin-resistant *Staphylococcus aureus* and other pathogens in pus samples of Orthopedic Department at a Tertiary Care Hospital in Pakistan
Ashfaq Ahmed, Rizwan Akram, Saeed Ahmad, Atiq Uz Zaman, Naeem Ahmad, Shahzad Javed, Amer Aziz
- 258 Intravitreal anti-vascular endothelial growth factor injection combined with panretinal photocoagulation for neovascular glaucoma in Indonesian patients with diabetes mellitus: a prospective study
Widya Artini, Ajeng Gracia, Aria Kekalih, Virna Dwi Oktariana, Andi Arus Victor, Anna Puspitasari Bani

- 268 Cranberries for women with recurrent urinary tract infection: a meta-analysis
Made Parulian Tambunan, Harrina Erlianti Rahardjo

Case Report

- 276 A case of nonalcoholic Wernicke's encephalopathy due to an extreme diet, based on magnetic resonance imaging features
Julius July, Adeline, Girianto Tjandrawidjaja, Yusak Mangara Tua Siahaan, Allen Widysanto, Hori Hariyanto, Rusli Muljadi
- 280 Double-J stents forgotten for four years: a case report
Johannes Cansius Prihadi, Christopher Kusumajaya

Review Article

- 284 A recent update of the diagnostic methods for tuberculosis and their applicability in Indonesia: a narrative review
Tri Nugraha Susilawati, Riska Larasati
- 292 A glance at molecular mechanisms underlying cisplatin-induced nephrotoxicity and possible renoprotective strategies: a narrative review
Bashar Adi Wahyu Pandhita, Deliana Nur Ihsani Rahmi, Nielda Kezia Sumbung, Bernardino Matthew Waworuntu, Regina Puspa Utami, Melva Louisa, Vivian Soetikno

Brief Communication

- 300 Voxel-wise analysis of 18F-fluorodeoxyglucose metabolism in correlation with variations in the presentation of Alzheimer's disease: a clinician's guide
Siti Aishah Abdul Aziz, Loh Jia Ling, Fathinul Fikri Ahmad Saad, Abdul Jalil Nordin, Normala Ibrahim, Arlina Nuruddin, Elinda Tunan, Rosalina, M. Iqbal Saripan, Subapriya Suppiah

Front Page: Brain FLAIR MRI shows symmetrical hyperintense lesions in the medial vestibular nuclei and the prepositus hypoglossal nuclei as reported by July et al and the X-ray of a coil fragmented double-J stent in the right ureter and a complete double-J stent on the left ureter as reported by Prihadi et al, these are published in this issue.

Medical Journal of Indonesia

Instructions for Authors

Submission

The submitted manuscript should be addressed to Editor-in-chief of the Medical Journal of Indonesia. Manuscript must be submitted through online submission (<http://mji.ui.ac.id/journal/index.php/mji/about/submissions>) by registered users. You can easily register in the journal system. For further question contact us at: mji@ui.ac.id.

General Principles

As a basic requirement, all articles submitted to the Medical Journal of Indonesia must be original work, which has never been published previously, and is submitted exclusively to the Medical Journal of Indonesia. They are written in the format of "Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals" (<http://www.icmje.org/>), which was updated in December 2018, and established by the International Committee of Medical Journal Editors (ICMJE). The Editorial Board reserves the right to edit all articles in aspects of style, format, and clarity. Authors may be required to revise their manuscripts for reasons of any aspect. Manuscripts with excessive errors in any aspect may be returned to authors for retyping or may be rejected. All manuscripts will be subjected to peer and editorial review.

We accept four types of articles: (1) original articles: **basic medical research**, **clinical research**, or **community research**; (2) **case report**; (3) **review article**; (4) **brief communication**. Basic medical researches cover in vitro researches or animal studies. Clinical researches cover researches done in human subjects. Community researches cover researches done in the community and are related with health policy. Case reports cover interesting reports of some cases and case series that also provide some statistical analysis. Review articles include systematic and narrative reviews that have a novelty in medical field. Brief communications include preliminary reports and manuscripts that do not cover the above categories, but are still related to and have important impacts for medical research and health policy.

Authors must also supply:

1. ICMJE conflicts of interest statement form (http://mji.ui.ac.id/journal/public/journals/1/coi_disclosure.pdf) (if there is any difficulties in accessing the form, you can directly visit <http://www.icmje.org/conflicts-of-interest/>),
2. copy of ethical approval (when needed), and
3. final checklist (<http://mji.ui.ac.id/journal/public/journals/1/FinalChecklist.pdf>) signed by all author(s).

Templates are available on <http://mji.ui.ac.id/journal/public/journals/1/template1.dot> for original articles and <http://mji.ui.ac.id/journal/public/journals/1/template2.dot> for case report. A cover letter should be provided at the submission and addressed to Editor-in-chief of Medical Journal of Indonesia, which should include statement about all previous submissions of the manuscript and previous reports that might be regarded as redundant publication of the work. If the manuscript has been submitted previously to another journal, authors are encouraged to provide previous comments along with the responses to accelerate the review process. Author(s) also have to mention the work whether it has been presented in a congress/conference/seminar.

Study Ethics

All submitted papers containing animal experiments and/or involving human subjects should have obtained approval from an independent ethics committee. The copy of approval should be provided to editorial office as mentioned above.

Publication Ethics

This journal follows guidelines from Committee on Publication Ethics (COPE) in facing all aspects of publication ethics and, in particular, how to handle cases of research and publication misconduct.

Conflicts of Interest

Conflicts of interest should be transparent as detail as possible as provided in the ICMJE form as a standardized authors' disclosures. The authors should declare that the authors had access to all the study and the sponsors did not intervene the data or the work. Each author should submit a separate form from ICMJE, given above and be sent to the office at submission. The description of conflict of interest in this form will be shown in this part.

Clinical Trial Registration

The authors are encouraged to register all clinical trials to the publicly accessible registration in any registry as recommended by ICMJE or integrated to WHO International Clinical Trials Registry Platform (ICTRP) (<https://www.who.int/ictcp/network/primary/en/>) or in ClinicalTrials.gov, which is a data provider to the WHO ICTRP. The trial registration number should be provided at the end of the abstract. The registration should be done prior to the conduct of the trial.

Structure and Language

Articles will be published in US English, following American spelling. Articles in English that are linguistically inadequate may be rejected. Manuscripts should be written double-spaced in all parts of the manuscript using Times New Roman 12, with margin of 2.54 cm of all sides. Articles must be submitted in the following structural order: title page and authorship, abstract, keywords, text, conflicts of interest, acknowledgments (if any), funding disclosure, references, tables, figures, and legends (if any).

Title Page and Authorship

The title page should contain: title of the article (concise, no abbreviations, maximum 16 words); full names of authors (without academic title); author's affiliation [name(s) of department(s) and institution(s)]; disclaimers (if any); corresponding author's name, mailing address, telephone and fax numbers, and e-mail address of the author responsible for correspondence about the manuscript (institution specific address and e-mail address of the corresponding author will be published along with the article); source(s) of support in the form of grants, equipment, drugs, or all of these (if any); short running title [maximum 40 characters

(letter and spaces)]; word counts [A word count for the text only (excluding abstract, acknowledgments, tables, figure legends, and references)]; number of figures and tables; and conflict of interest declaration for each author.

Authorship of articles should be limited to those who have contributed sufficiently to take public responsibility for the contents. This includes (a) conception and design, or analysis and interpretation of data, or both; (b) drafting the article or revising it critically for important intellectual content; (c) final approval of the version to be published; (d) and agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved. Contributors who meet fewer than all four criteria above should be listed in acknowledgment and the contributions should be specified. Corresponding authors should assure the permission of all acknowledged individuals written in the acknowledgment.

Abstract and Keywords

The **abstract** should be prepared in English with a structured abstract maximum 250 words for biomedical, clinical, and community research articles; and unstructured maximum 150 words for case report, brief communication, and review article. They should be concise and precise with enough information, highlighting the points and importance of the article which contains: One or two sentences of background, purpose of study; methods (basic procedures, study subject selection, observational, and analytical methods); main findings or results; and principal conclusion. **Keywords** are limited to 3 - 6 words or short phrases that will allow proper and convenient indexing.

Text

The **text** should be structured as **introduction, methods, results, and discussion** (IMRAD). Methods should provide clarity about how, why, and when the study was done. The methods section should include the statement of approval by local, regional, or national review board. It should also clearly describe the selection of the study's participants. Equipment used should be identified in methods by specifically giving the manufacturer's name and address in parentheses. Give references to established methods. Conclusion should be stated at last sentence in the discussion. Footnotes are not advisable; their contents should rather be incorporated into the text. Use only standard abbreviations; use of nonstandard abbreviations can be confusing to readers. Avoid abbreviations in the title of the manuscript. The spelled-out abbreviation followed by the abbreviation in parenthesis should be used on first mention unless the abbreviation is a standard unit of measurement. If a sentence begins with a number, it should be spelled out. Cite in numerical order every reference, figure and table. Use Arabic numerals in superscript to cite references in Vancouver style.

Statistical Methods

All **statistical methods** used should be described in detail in the methods section of the manuscript. Avoid relying solely on statistical hypothesis testing, such as p values, which fail to convey important information about effect size and precision of estimates. Define statistical terms, abbreviations, and most symbols. Specify the computer software and version used.

Conflicts of Interest

Conflict of interest should declare the authors' conflicts of interest, sources of support for the work, and whether the authors had access to the study data. Each author should submit a separate form from ICMJE, given above and be sent to the office at submission. The description of conflict of interest in this form will be shown in this part.

Acknowledgments

Personal **acknowledgments** should be limited to appropriate professionals who contributed to the paper, including technical help and financial or material support, also general support by a department chair-person.

Funding sources

Funding sources for the work should be described specifically with explanations of the role of those sources and the authors should declare that the supporting sources had no involvement in specific role. It should be written separately and limited to the funding for the work. The role of the funder(s) need to be described whether they have role in the design; data collection, management, analysis and interpretation of the data; and preparation, review, or an approval of the manuscript; or the decision to submit the manuscript for publication.

Tables and Figures

Total number of Table and figures are advisably not to exceed 6 in number. **Tables** and its title should be presented in separate sheets. Tables should be numbered in Arabic numerals, captions should be brief, clearly indicating the purpose or content of each table. Provide a footnote to each table, identifying in alphabetical order all abbreviations used. Number tables consecutively in the order of their first citation in the text and supply a brief title for each. Do not use internal horizontal or vertical lines. Give each column a short or an abbreviated heading. Explain all nonstandard abbreviations and explanatory matters in footnotes, and for explanatory matters use the following symbols, in sequence: *, †, ‡, §, ¶, **, ††, ‡‡, §§, ¶¶, etc. Identify statistical measures of variations, such as standard deviation and standard error of the mean. Be sure that each table is cited in the text. If you use data from another published or unpublished source, obtain permission and acknowledge that source fully.

Figures should be either professionally drawn or photographed, and submitted in a format (JPEG or TIFF) in the following resolutions [gray-scale or color in RGB (red, green, blue mode) at least 300 dpi (dots per inch). For x-ray films, scans, and other diagnostic images, as well as pictures of pathology specimens or photomicrographs, send sharp, glossy, black-and-white or color photographic prints, usually 127 x 173 mm (5 x 7 inches). Write the word "top" on the back of each figure at the appropriate place. Figures should be made as self-explanatory as possible, titles and detailed explanations belong in the legends-not on the figures themselves. Photomicrographs should have internal scale markers. Symbols, arrows, or letters used in photomicrographs should contrast with the background. When symbols, arrows, numbers, or letters are used to identify parts of the illustrations, identify and explain each one clearly in the legend. Explain the internal scale and identify

the method of staining in photomicrographs. Photographs of potentially identifiable people must be accompanied by written permission to use the photograph.

Figures should be numbered consecutively according to the order in which they have been cited in the text. If a figure has been published previously, acknowledge the original source and submit written permission from the copyright holder to reproduce the figure. Permission is required irrespective of authorship or publisher except for documents in the public domain. Color figures are allowed in special circumstances, provided that the author is willing to cover the cost of reproduction. If the original size of the figures is too large, you can provide us lower quality figures on submission and good quality after the acceptance of the manuscript.

Units of Measurement

For measurements use both local and S.I. (System International) units. Measurements should be abbreviated (e.g. mm, kcal, etc.) in accordance to the Style Manual for Biological Sciences and using the metric system. Measurements of length, height, weight, and volume should be reported in appropriate scientific units. Temperatures should be in degrees Celsius. Blood pressures should be in millimeters of mercury (mmHg). Drug concentrations may be reported in either SI or mass units, but the alternative should be provided in parentheses where appropriate.

References

References are advisably not to exceed 25 in number but not less than 10, and should in general be limited to the last decade. Reference exceed than 25 may be accepted when it is necessary. References must be numbered in the order in which they are mentioned in the text. Use the style of the examples below, which are based on the International Committee of Medical Journal Editors (ICMJE) Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals: Sample References (http://www.nlm.nih.gov/bsd/uniform_requirements.html). The titles of journals should be abbreviated according to the style used for MEDLINE (www.ncbi.nlm.nih.gov/nlmcatalog/journals). Avoid using abstracts as references. Information from manuscripts submitted but not yet accepted should be cited in the text as “unpublished observations” with written permission from the source. Papers accepted but not yet published may be included as references; designate the journal and add “Forthcoming”. Avoid citing “personal communication” unless it provides essential information not available publically, name the person and date of communication, obtain written permission and confirmation of accuracy from the source of a personal communication. Authors is recommended to use reference management software, in writing the citations and references such as: Mendeley®, Zotero®, EndNote®, and Reference Manager®. Here are some examples of the references:

1. Standard journal article

Up to six authors, list all the authors.

- Halpern SD, Ubel PA, Caplan AL. Solid-organ transplantation in HIV-infected patients. *N Engl J Med*. 2002 Jul 25;347(4):284-7.

More than six authors, list the first six authors, followed by et al.

- Rose ME, Huerbin MB, Melick J, Marion DW, Palmer AM, Schiding JK, et al. Regulation of interstitial

excitatory amino acid concentrations after cortical contusion injury. *Brain Res*. 2002;935(1-2):40-6.

Optional addition of a database’s unique identifier for the citation: [Edited 12 May 2009]

Copyright Licenses

Authors who publish with Medical Journal of Indonesia agree to the following terms:

1. Authors retain copyright and grant Medical Journal of Indonesia right of first publication with the work simultaneously licensed under a Creative Commons Attribution-NonCommercial License (<http://creativecommons.org/licenses/by-nc/4.0/>) that allows others to remix, adapt, build upon the work non-commercially with an acknowledgement of the work’s authorship and initial publication in Medical Journal of Indonesia.
2. Authors are permitted to copy and redistribute the journal’s published version of the work non-commercially (e.g., post it to an institutional repository or publish it in a book), with an acknowledgement of its initial publication in Medical Journal of Indonesia.

Publication Fee

This journal only charges the article publication fee for all manuscript types, without any submission fee. The publication fee is US\$ 300 for foreign authors and IDR 3,000,000,- for Indonesian authors. For each printed page that contains colored figure, you will be asked to pay US\$ 50 (IDR 500,000,-) each printed page more.

When the accepted manuscript has been proofread by the authors, Medical Journal of Indonesia office will send the invoice to the corresponding author and they need to complete the payment process before being published. To enhance the research in health programme, Medical Journal

of Indonesia will cover the publication fee of authors from the countries that are included in group A and group B countries of HINARI by WHO. Waiver of payment is not only limited to those countries. All authors may ask a waive, and they need to send letter of waiver to editor-in-chief explaining the importance of the study and why author(s) need to be waived. The decision is made prior to the process of the review and it is the editors' privilege to approve or reject the request.

Updated - March 2019
